Introducing the Microlab® 700

The Microlab 700 is a highly precise syringe pump with a new generation touchscreen controller that brings a superior technological solution, an interface designed to quickly and easily dilute and dispense fluids. This positive displacement system provides better than 99% accuracy, independent of a liquid's viscosity, vapor pressure, and temperature. The inert fluid path minimizes sample carryover and is compatible with harsh chemicals.

All Laboratories can use the Microlab 700

Every laboratory has tasks too small to automate and too large to reliably accomplish by hand. The Microlab 700 is a semi-automated liquid handler designed specifically for these in-between applications that increase throughput and consistency while reducing cost and wasted buffer. Common industries using the product are:

- Pharmaceuticals
- Biotechnology
- In-Vitro Diagnostics
- Forensics
- Food and Beverage Industry
- Dairy Industry
- Environmental Analysis
- Mining Industry
- Textile Industry

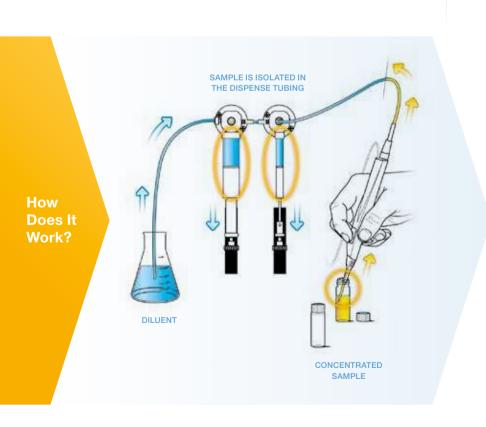

Dual Syringe Diluters

Concorde Hand Probe

The Dual Syringe Diluter configuration uses two syringes to create up to a 1:50,000 dilution in a single step, drastically reducing preparation time and wasted buffer. The diluent washes the tubing between each sample, minimizing carryover for even the most sensitive techniques including:

- Atomic absorption (AA)
- Inductively coupled plasma spectroscopy (ICP)
- High performance liquid chromatography (HPLC)
- Gas chromatography (GC)
- Liquid scintillation

Step 1

Program sample and diluent volume.

Step 2

Trigger the hand probe to fill left syringe with diluent and aspirate sample into the hand probe with the right syringe.

Step 3

Trigger the hand probe to dispense the sample and then the diluent into the vial to complete the dilution and wash the tube for the next sample.

Dilution Wizard

Accurately dilute concentrated samples with diluent over a wide range of dilution ratios.

Diluter Ordering Information

Part number	Product name	Description
10103468	ML715-DIL	Dual syringe diluter with Advanced controller
10103471	ML725-DIL	Dual syringe diluter with Premium controller

The -DIL model ships with the Concorde hand probe, universal valves, fill/dispense tubing, accessory holder, country-specific power cord, and the choice of two syringes. If syringes are not selected at the time of the order, 2.5 mL and 250 µL syringes are included.

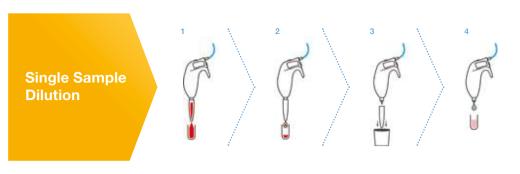

Disposable Tip Hand Probe (DTHP)

For sensitive applications, the sample is aspirated into a disposable plastic tip which is thrown away between each sample, eliminating any chance for carryover. Applications that benefit from the DTHP include:

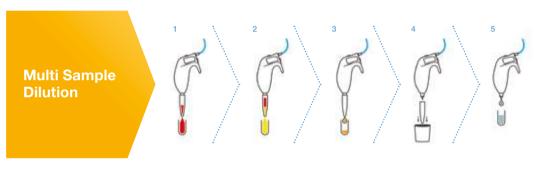

- Forensics for some applications regulatory considerations make disposable tips the preferred option
- Sterile samples sterile disposable tips can be used to avoid transferring contamination between sample vessels
- DNA amplification for applications where a single amplified strand of DNA is enough to impact results

Dilution Options

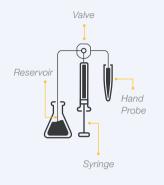

- 1 The trigger is pressed and the sample is aspirated into the tip using the right syringe while diluent is drawn into the left syringe
- 2 The trigger is pressed again and the sample is dispensed from the tip
- 3 The tip is ejected
- 4 Another trigger dispenses the diluent to complete the dilution

- 1 Aspirate Sample 1 into ClickSure Tip 2 Aspirate Sample 2. Repeat with additional solutions
- 3 Dispense Samples 4 Discard ClickSure Tip 5 Dispense Diluent

Disposable Tip Hand Probe Ordering Information

Part number	Product name	Description
10103470	ML725-DTHP	Microlab 700 Diluter with Disposable tip Hand probe

ClickSure Tips for DTHP Ordering Information

Part Number	Description
235539	1 mL, non-sterile ClickSure Tips, 960 tips, racked
235545	1 mL, non-sterile ClickSure Tips, 960 tips, bulk

The -DTHP model ships with the Disposable Tip Hand Probe, universal valves, fill tubing, Cable Management System, country-specific power cord, and the choice of two syringes are not selected at the time of the order, 2.5 mL and 250 µL syringes are included.

Dispensers

The Microlab 700 is able to dispense volumes from 100 nL to 50 mL and uses positive displacement syringes to accurately dispense volatile, viscous, and dense liquids independent of atmospheric influences. The inert fluid path is compatible with harsh chemicals, making the Microlab 700 the most reliable and robust dispensing system available.

Single Syringe Dispenser

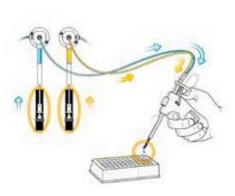

The syringe fills from a reservoir and dispenses from the hand probe.

Dual Syringe Dispenser

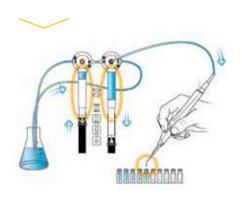

Each syringe fills from a separate reservoir and dispenses separately from the hand probe.

Continuous Dispenser

One syringe fills while the other syringe is dispensing from the same reservoir.

Aliquot Dispense Wizard

Repetitively dispense aliquots of the same volume at the press of a button.

Single Syringe Aliquot or Serial Dispense

FILL FROM RESERVOIR

DISPENSE THROUGH HAND PROBE

DISPENSE

DISPENSE

Serial Dispense Wizard

Repetitively dispense aliquots of differing volumes at the press of a button.

Dual Syringe Aliquot or Serial Dispense

FILL FROM RESERVOIR

DISPENSE THROUGH HAND PROBE

DISPENSE

DISPENSE

Titration Wizard

Slowly add liquid to another liquid until an end-point is reached. An example of this application is adding acid or base to a pH buffer.

Titration

A large initial volume is dispensed to get close to the endpoint. Then a smaller step volume is dispensed until the endpoint is reached

FILL FROM RESERVOIRS

DISPENSE THE INITIAL VOLUME

DISPENSE THE STEP VOLUME

Pipette Wizard

Simulate a manual pipette used to transfer liquid from one vessel to the next.

Dispenser Ordering Information

Part number	Product name	Description
10103458	ML710-DIS	Single Syringe Dispenser with Advanced Controller
10103460	ML720-DIS	Single Syringe Dispenser with Premium Controller
10103461	ML715-DIS	Dual Syringe Dispenser with Advanced Controller
10103464	ML725-DIS	Dual Syringe Dispenser with Premium Controller
10103465	ML715-CNT	Dual Syringe Continuous Dispenser with Advanced Controller
10103467	ML725-CNT	Dual Syringe Continuous Dispenser with Premium Controller

All dispensers ship complete with a Concorde hand probe (the dual –DIS uses the Dual Push Button hand probe), universal valve(s), fill/dispense tubing assembly, accessory holder, country-specific power cord, and the choice of syringes. If no syringe(s) are selected at the time of the order the –DIS will ship with 1 mL syringe(s) and the –CNT will ship with 10 mL syringes.

Standalone Syringe Pumps

Simple to Integrate

Take full command of your diluting and dispensing applications with the Microlab 700 standalone syringe pump. The standalone syringe pump allows you to custom program methods and deploy commands to any instrument on your network from anywhere in the world, giving you unparalleled control of your process.

PROGRAM YOUR OWN METHODS IN

0

Visual C#[®]
Visual Basic[®]
LabVIEW[™]

Choose Ethernet or RS-232 Communication

Choose Ethernet Communication if

- The application requires control over all details of the pump like the front LED lights, acceleration speeds, custom initialization routines, etc.
- Remote control or monitoring of the pump is important. This includes dispensing in restricted environments like clean rooms, rooms with high radioactivity, or chemical contamination, etc.
- Development is being done in a Microsoft .NET 2.0 programming environment. The API simplifies programming with on screen help in an industry standard format.

Choose RS-232 Communication if

- The control device is a Programmable Logic Controller.
- The control device is not a PC running Windows® or the programming language is not compatible with Microsoft® .NET 2.0 framework.
- The application has already been implemented using an older RS-232 device like Microlab 500.
- The application requires the use of another Hamilton RS-232 device like Modular Valve Positioner.

Standalone Pump Ordering Information

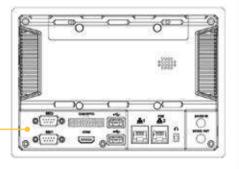

Part Number	Description
ML630	Single Syringe Pump
ML635	Dual Syringe Pump

All standalone pumps ship complete with a universal valve(s), country-specific power cord, Custom Programmer kit, and choice of syringes. If no syringe(s) is/are selected at the time of the order 1 mL syringe(s) will be included automatically.

Microlab 700 Hardware

Controller Features

The Microlab 700 controller features a large, easy-to-use touchscreen with a performant processor, two USB ports for connection of RFID scanner, QR/Barcode scanner, USB flash drive; two RS232 Port for connection of balances, label printer; two Ethernet Ports for connection to Microlab base unit and network.

Microlab 700 Connectors

Connector	Interface	Function
1010 #1	RS232C COM1	Analytical or precision balance
1010 #2	RS232C COM2	Label printer, Log printer
Micro SD card slot	Micro SD	Slot for SD cards up to 64 GB
USB-A #1	USB 2.0 host	Slot for micro SD cards up to 64 GB
USB-A #2	USB 2.0 host	RFID-scanner, QR code scanner
RJ-45 #1	LAN-1 100M	Microlab 700 base unit
RJ-45 #2	LAN-2 100M	LAN for intranet and internet
Power Jack IN	24VDC IN	Power input from DC power cable
Power Jack OUT	24VDC OUT, 3A max	Power output for Microlab 700 base unit
Wi-Fi	802.11 a/b/g/n 2.4 GHz	Wireless LAN for intranet and internet
Bluetooth 4.0	2402MHz-2480MHz	Used for accessories in future

MICROLAB LABEL PRINTER

MICROLAB DIGITAL SCANNER

MICROLAB RFID READER

Controller Accessories

Part number	Product name
10106736	Microlab RFID Reader
10106738	Microlab Digital Scanner
10106739	Microlab Label Printer*
10106806	Labels for Microlab Label Printer

^{*} Power supply cord will be selected from page <?>

Syringe Pump Features

The Microlab 700 is available as a single or dual syringe system. The high torque, precision stepper motors provide unsurpassed positional accuracy across the full range of Hamilton syringes from 10 µL to 50 mL. The instrument communicates with the controller or a corporate network via an Ethernet port. Serial communication via RS-232 is also possible for programming in a non Windows® environment.

- 1 High torque valve motors
- 2 Precision syringe drives with 48,000 step resolution over 60 mm
- 3 Illuminated power and prime
- 4 Independent left and right trigger ports

- 5 Fanless heat vent
- 6 24 volt power input
- 7 CAN daisy chain input/output
- 8 RS-232 console port
- 9 Power over Ethernet (PoE)
- 10 TTL input/output

Microlab Software

NEW UTILITIES

New Utility Menus

- Easy to access and human readable error log
- Audit Trail viewer
- Update software via internet
- Update software via USB flash drive / SD card
- Log Viewer: Logs can be opened with PDF viewer, directly on the controller screen
- Possibility to create a full encrypted system backup and device specific (protected to access only for a specific device)
- Restore function

UPDATED WIZARD

Dry Weight Dilution 2.0

- Improved usability
- Save to favorites
- Support of many balance models (Mettler, Sartorius, Kern, Ohaus)

NEW CLEANING FEATURES

Cleaning features

- Cleaning reminder (time period-based)
- Cleaning reminder (cycle count based)
- Auto reset of reminder after cleaning

MAINTENANCE

Maintenance features

- Error statistics
- Maintenance reminder (date-based)
- Maintenance warning (time period-based)

NEW USER SUPPORT

New Help Menu

- Send emails to customer support directly from device
- Read user manual directly from device
- Screen sharing (Remote control)
- Tutorial videos
- Easier understanding of the Microlab platform functionalities through the new help menu

NEW CONFIGURATIONS

New LyncStore 700 Menu

Premium Version only

- Add LyncStore Account
- Sync Log files
- Sync Audit Trail
- Sync Custom Methods
- Sync Favorite Methods (created by means of the existing Wizards)
- Allow Remote Access

New Communication Menu

- Manage WLAN
- Manage LAN
- Manage external devices & accessories

New GLP Printer Menu

 Configure GMP/GLP complaint print content (Protocol Printer)

New Security Settings

- Multiple Administrator accounts
- Enable Audit Trail Dialogs
 (Parameter change must be justified)
- Enable PDF signatures
- Automatic sign out after X minutes
- Sign-in with RFID card

Advanced Controller Software

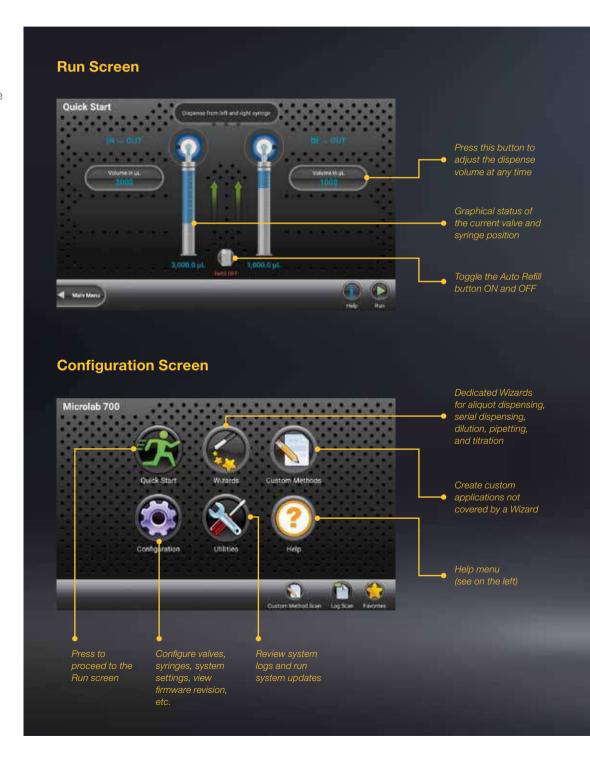

The controller is ideal for completing simple diluting and dispensing tasks. Quickly set the desired volume in the Quick Start Run Screen and begin.

Simple Diluting

Diluent is drawn by the left syringe and sample is drawn into the tubing by the right syringe. Both syringes dispense to complete the dilution.

Simple Dispensing

Solvent is drawn into the syringe and dispensed out through the hand probe.

Controller

Compliance and Logging

The software provides a variety of security protections, simplifies adherence to FDA GXP regulations, ability to administer user accounts and passwords, create log files that conform to 21 CFR Part 11 and manage log files on a PC using the LyncStore application.

Language Support

The Microlab 700 features language support for English, Spanish, German, French, Italian, and Chinese.

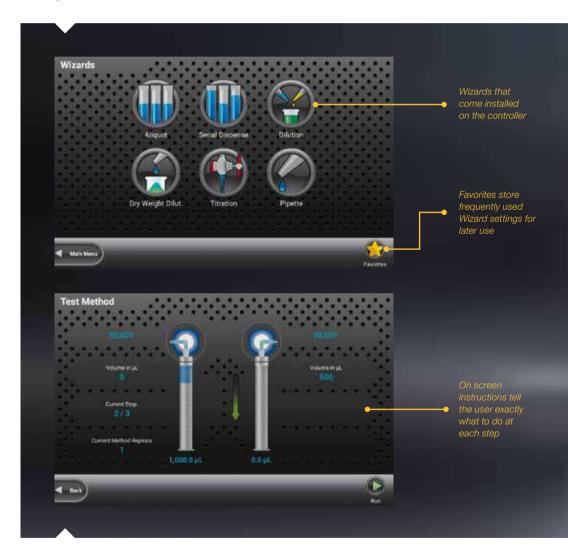

Archiving and Sharing Methods

Favorites and Custom
Methods are stored on the
Internal Storage or external:
USB, microSD or remotely
by LyncStore connectivity.

Wizards

Wizards are designed to simplify the programming of common everyday methods. The controller ships with the most popular Wizards installed but it is simple to add or delete Wizards from the menu. Visit **www.hamiltoncompany.com/microlabwizards** to see a complete list of available Wizards.

Custom Methods

Custom methods can be created to accomplish unique liquid handling tasks. Incorporate loops, delays, external triggering, and execution counters with valve and syringe movements to create complex methods.

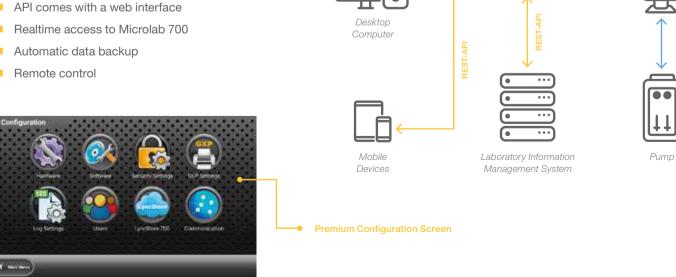

Premium Configuration

LyncStore 700 features

- Best-Practice API documentation with swagger
- Compliant with 21 CFR Part 11

ML700

Controller

REST-API

Network Switch

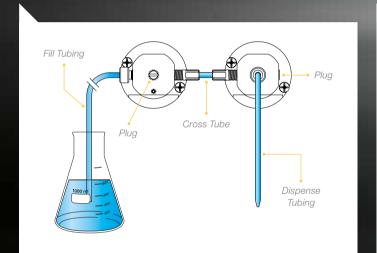

REST-API

Universal Valves

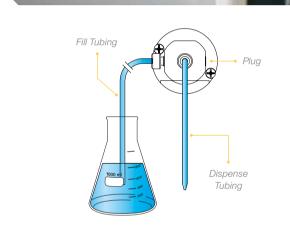

Innovative fluid logic allows the same universal valve to be used in all Microlab 700 diluting and dispensing applications. Interchange the valve plugs and tubing to achieve the following configurations in a matter of minutes.

Valve Plumbing Based on Instrument Configuration:

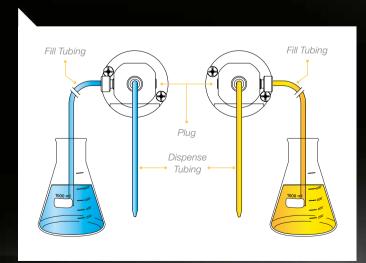

Dual Syringe Diluter

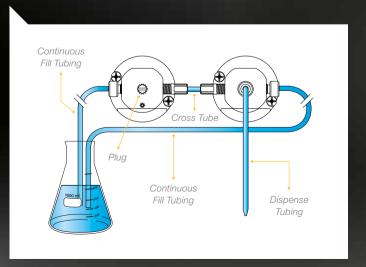

Single Syringe Dispenser

Dual Syringe Dispenser

Continuous Dispenser

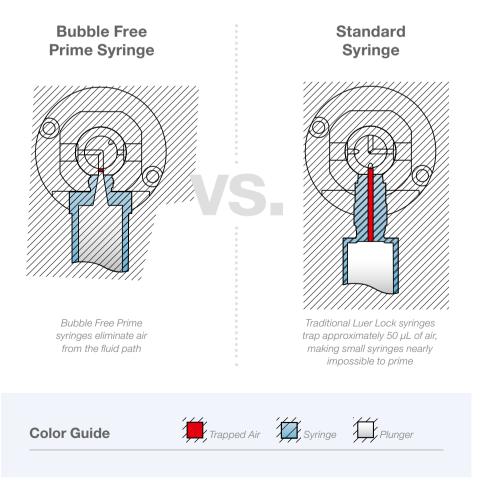

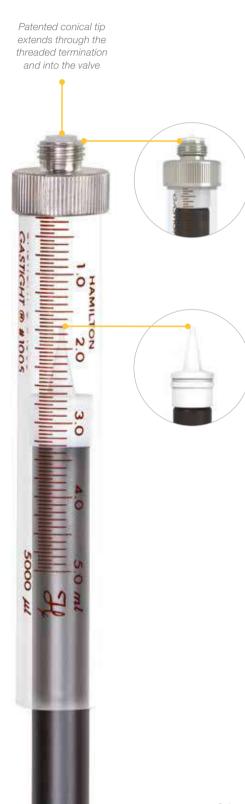

Bubble Free Prime Syringes

For any syringe pump, the key to achieving the most accurate dispenses is eliminating all air from the fluid path. Traditional syringes trap approximately 50 μ L of air between the tip of the syringe and the valve. For small syringes, this trapped air is the last to leave the syringe and the first to be drawn back in, making them difficult if not impossible to prime.

The Bubble Free Prime syringe has a conical plunger tip that extends through the threaded termination and into the valve. This unique design expels the air from the syringe and valve decreasing the number of priming cycles required.

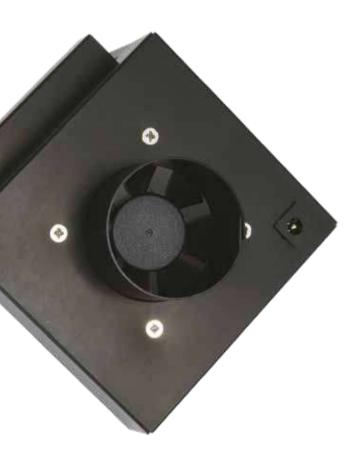

Accessories

Protect Your Investment with AirShield

The AirShield is a separate accessory that can be purchased for any Microlab 700 instrument. It creates a positive pressure blanket of fresh air inside the pump that pushes air out over critical components on the outside of the pump, protecting them from the environment.

Localized Harsh Environment

In many labs the air is relatively clean but samples and reagents placed near the instrument result in a localized environment that can be harmful. For these labs, it is sufficient to source clean air from the back of the instrument away from the microenvironment.

Optional Snorkel for Fresh Air Supply

For labs with a more demanding atmosphere it is possible to source clean air via a snorkel that connects directly to the AirShield. Fresh air is then brought from outside the harmful environment to create a shield of clean air around all critical instrument components.

355238	Australia, New Zealand, Argentina, China	

Selecting a Syringe

Select the smallest svringe with a maximum volume that is greater than the largest volume to be dispensed. Ideally the smallest volume to be dispensed should fall within the optimal ranges listed to the left. The Microlab 700 can dispense volumes below the optimal range but there will be some impact on accuracy and precision. The SaltLine Syringes should be used when working with solutions that have a high salt concentration. Contact a Hamilton sales representative for additional assistance.

About Hamilton

The Measure of Excellence®

Hamilton Company specializes in the development, manufacturing, and customization of precision measurement devices, automated liquid handling workstations, and sample management systems. Hamilton's processes are optimized for quality and flexibility. Whether it's a custom needle with a guick delivery timeframe, a special length pH sensor, or a comprehensive solution to fully automate your assay workflow, trust that Hamilton's products will always meet your needs.

Our complete portfolio

Laboratory Products

Hamilton Laboratory Products manufactures Microliter™ and Gastight® syringes that set the standard for analytical fluid measurement. Other products include custom needles, semi-automated diluters and dispensers, polymeric HPLC columns, pH electrodes, pipettes, and more.

Robotics

Hamilton Robotics provides automated liquid handling workstations and laboratory automation technology for the scientific community. With a focus on innovative design, our products incorporate Hamilton's patented liquid handling technologies for fully automated solutions. In addition to liquid handling platforms, we also offer application-specific solutions, small devices, and consumables.

Hamilton Storage offers ultra-low temperature automated sample management systems for storage of a variety of labware. Hamilton's line of biobanking and compound management systems, benchtop devices, and consumables are designed for sample integrity, flexibility, and reliability.

Process Analytics

Hamilton Process Analytics includes innovative solutions for the online measurement of pH, dissolved oxygen, conductivity, ORP, viable cell density, and total cell density. Hamilton's proprietary Arc® intelligent sensor technology eliminates the need for transmitters and moves the functionality to your smartphone or tablet.

OEM Solutions

Many of the world's top manufacturers utilize Hamilton products and expertise to get their innovations to market faster with lower development and manufacturing costs. As an OEM partner, we offer the ability to integrate our proven syringe pumps or pipetting channels, customize our proven liquid handling platforms, or design a complete system to automate your novel chemistry.

> Hamilton Company has been a leading global manufacturer for more than 60 years, with headquarters in Reno, Nevada; Franklin, Massachusetts: Timisoara. Romania: and Bonaduz, Switzerland; and subsidiary offices throughout the world.
