

HAMILTON®

Hamilton Selection Guide Needles

Quickly Find the Needle You Need

The Anatomy of a Needle

The **Needle Hub** is attached to the needle cannula and is used to connect the needle to a syringe, tube, or fitting

The **Needle Cannula** will be defined by **gauge** and **length**

The opposite end of the needle is shaped into a **Needle Point Style** that is appropriate for the application

Choosing the Appropriate Hub

Luer Lock Needle Hubs

Designed to fit any standard Luer, Luer Lock syringe or Luer Lock termination.

	NEEDLE HUB STYLE	COMPATIBILITY	NEEDLE GAUGE
METAL HUB N NEEDLE		PTFE Luer Lock (TLL) Syringes 25 µL to 2 L	33 – 10 gauge
KEL-F HUB KF NEEDLE		PTFE Luer Lock (TLL) Syringes 25 µL to 2 L Luer Tip (LT) Syringes 10 µL to 10 mL	31 – 10 gauge
VENTING TLL FEMALE NEEDLE		PTFE Luer Lock (TLL) Syringes 25 µL to 2 L	* / **
VENTING TLL MALE NEEDLE		PTFE Luer Lock (TLL) Syringes 25 µL to 2 L	* / **
PEEK TLL NEEDLE		PTFE Luer Lock (TLL) Syringes 25 µL to 2 L Luer Tip (LT) Syringes 10 µL to 10 mL	***

*For standard needle dimensions, go to page 17

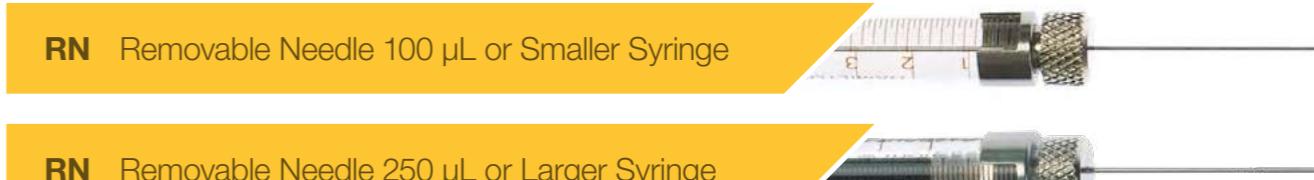

**For custom needle dimensions, go to page 22

***Outer Diameter 1.6 mm, Inner Diameter 0.8 mm

Removable Needle Hubs

Seated at the zero line of the syringe, minimizing dead volume, and enabling complete priming of small volume syringes. The difference between a Small and Large Hub Removable Needle (RN) is the outer diameter of the hub and ferrule.

	NEEDLE HUB STYLES	COMPATIBILITY	NEEDLE GAUGE
SMALL HUB REMOVABLE NEEDLE SMALL RN NEEDLE		Removable Needle (RN) Syringes 2.5 µL to 100 µL	34 – 18 gauge
LARGE HUB REMOVABLE NEEDLE LARGE RN NEEDLE		Removable Needle (RN) Syringes 250 µL to 10 mL Sample Lock (SL) Syringes 50 µL to 100 mL	31 – 10 gauge
PEEK LARGE HUB REMOVABLE NEEDLE PEEK LARGE RN NEEDLE		Removable Needle (RN) Syringes 250 µL to 10 mL Sample Lock (SL) Syringes 50 µL to 100 mL	***

Remove the original needle and PTFE ferrule from the RN termination before inserting the replacement needle assembly.

ChemSeal Needle Hubs

Designed to fit any standard ChemSeal / C-Termination Syringe or any such 1/4"-28 UNF thread.

ChemSeal Termination Syringe		
	NEEDLE HUB STYLES → COMPATIBILITY	NEEDLE GAUGE
C-F METAL HUB NEEDLE C FEMALE NEEDLE	ChemSeal Syringes 10 µL to 10 mL	26s – 10 gauge
C-M COLORED PEEK NUT FOR RN NEEDLE C MALE NEEDLE	Can be connected with any Female 1/4"-28 UNF thread	–
VENTING C-FEMALE NEEDLE	ChemSeal Syringes 10 µL to 10 mL Septum piercing applications	* / **
VENTING C-MALE NEEDLE	PEEK Syringes 10 µL to 50 mL	* / **

*For standard needle dimensions, go to page 21

**For custom needle dimensions, go to page 22

Complete priming of the syringe and needle is critical to achieving the stated accuracy and precision. Excessive dead volume can make it impossible to completely prime syringes smaller than 100 µL.

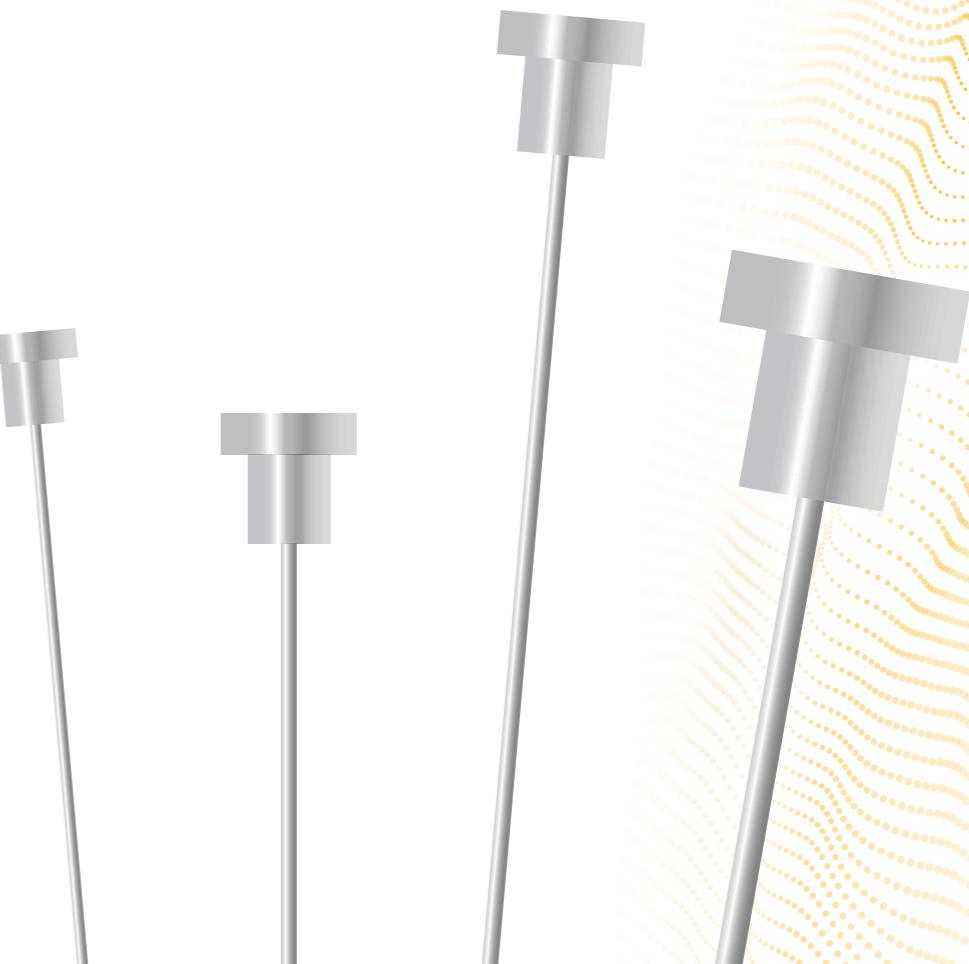

All colored Nuts are sold in three-packs, separately from the needles. The color will need to be specified on order.

Valve Port Needle Hubs

Designed to be connected to a tubing port on a Hamilton valve.

NEEDLE HUB STYLES	COMPATIBILITY	NEEDLE GAUGE
HAT NEEDLE	Use the needle bushing part number 35056 to connect the needle directly to any 1/4"-28 UNF thread	14 - 26 gauge

Hat needles are sold in three-packs

Picking the Suitable Gauge

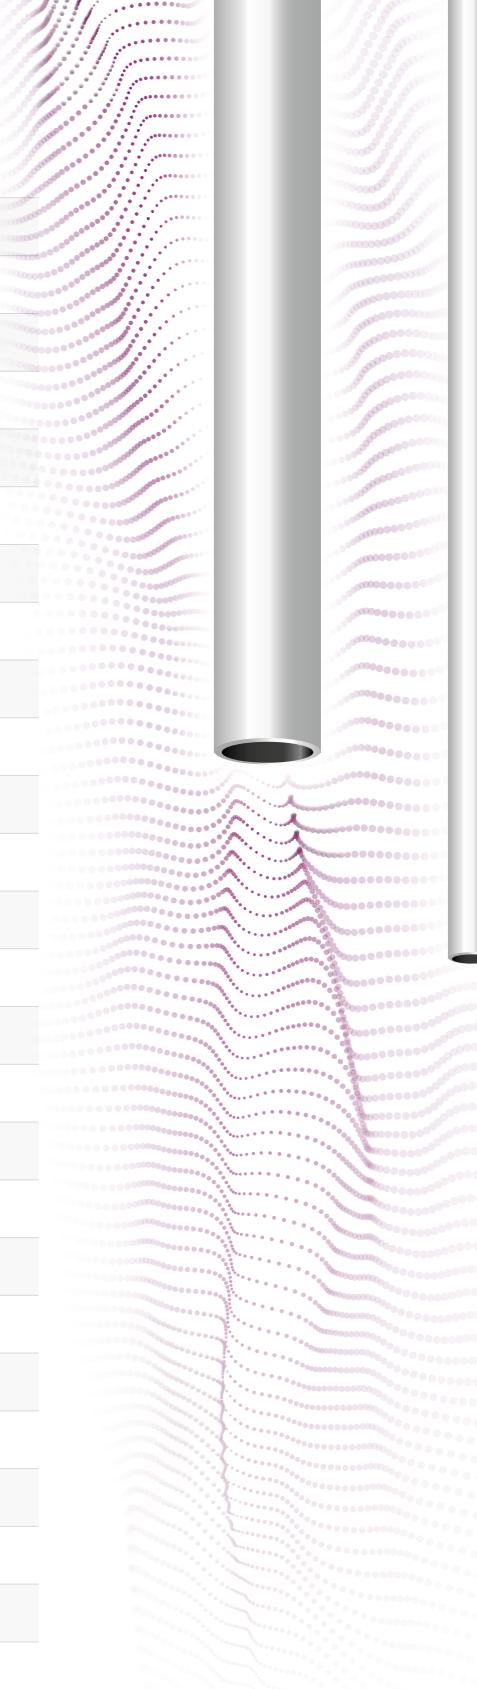

The Gauge Index contains the nominal inner and outer dimensions of the tubing used in Hamilton needles. If the needle dead volume exceeds 20% of the nominal syringe volume then special priming steps may be required.

If the application requires septum penetrations, it would be recommended to choose a gauge smaller than 26 gauge or there will be an increased risk of bending the needle. Also avoid needles larger than 22 gauge to avoid coring the septum resulting in a clogged needle.

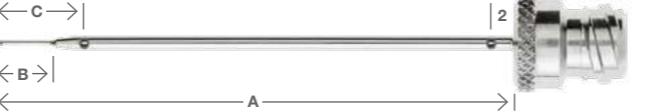

When choosing a needle gauge to connect to a small volume syringe, it is critical to take into account the needle's dead volume which is listed in $\mu\text{L}/\text{mm}$ in the gauge index.

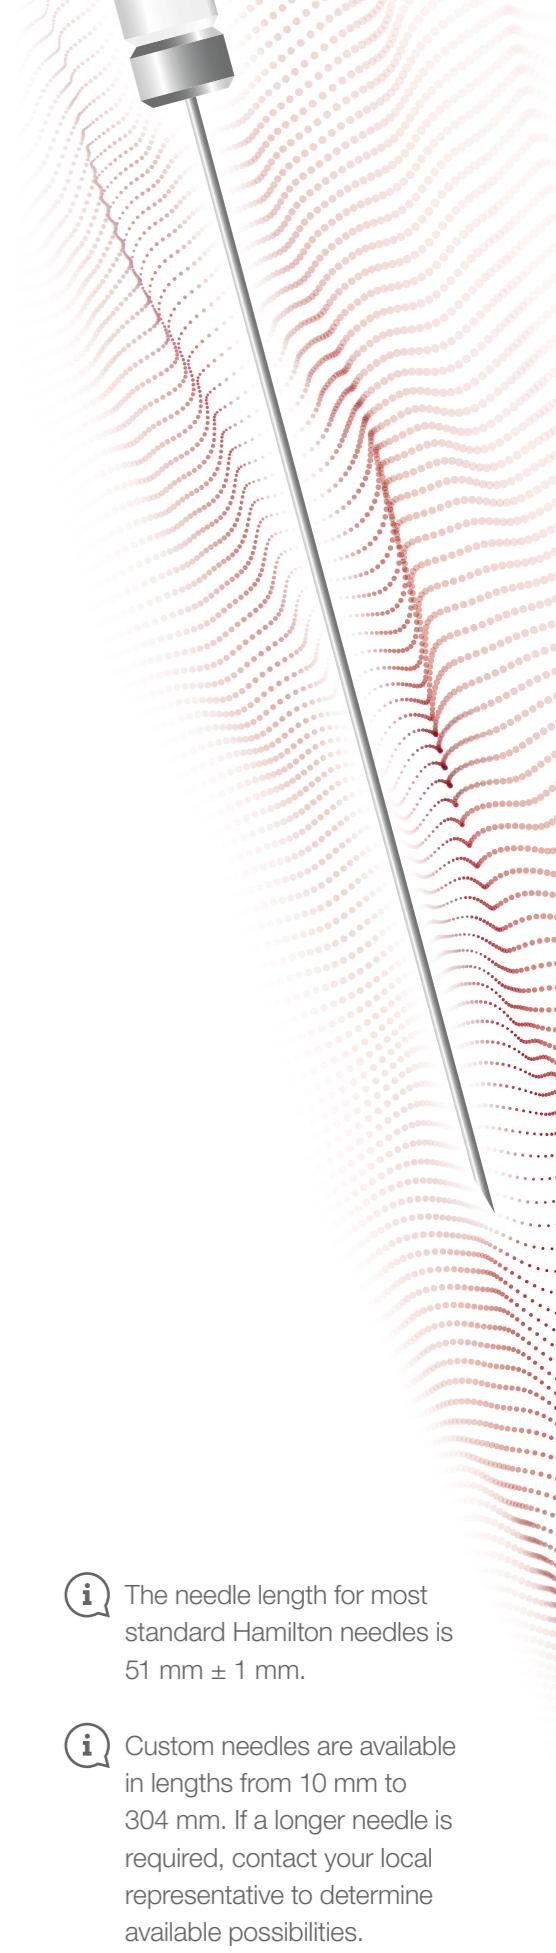

When the sample to be dispensed is viscous, a small gauge needle (27 – 34) can make it difficult to aspirate sample into the syringe. If a small gauge needle is required, it may be necessary to backfill the syringe.

GAUGE	NOMINAL OD	NOMINAL ID	VOLUME
34	0.159 mm	0.051 mm	0.02 $\mu\text{L}/\text{cm}$
33	0.210 mm	0.108 mm	0.09 $\mu\text{L}/\text{cm}$
32	0.235 mm	0.108 mm	0.09 $\mu\text{L}/\text{cm}$
31	0.261 mm	0.133 mm	0.14 $\mu\text{L}/\text{cm}$
30	0.312 mm	0.159 mm	0.20 $\mu\text{L}/\text{cm}$
29	0.337 mm	0.184 mm	0.27 $\mu\text{L}/\text{cm}$
28	0.362 mm	0.184 mm	0.27 $\mu\text{L}/\text{cm}$
27	0.413 mm	0.210 mm	0.35 $\mu\text{L}/\text{cm}$
26s	0.474 mm	0.127 mm	0.13 $\mu\text{L}/\text{cm}$
26	0.464 mm	0.26 mm	0.53 $\mu\text{L}/\text{cm}$
25s	0.515 mm	0.153 mm	0.18 $\mu\text{L}/\text{cm}$
25	0.515 mm	0.260 mm	0.53 $\mu\text{L}/\text{cm}$
24	0.566 mm	0.311 mm	0.76 $\mu\text{L}/\text{cm}$
23s	0.642 mm	0.116 mm	0.11 $\mu\text{L}/\text{cm}$
23	0.642 mm	0.337 mm	0.89 $\mu\text{L}/\text{cm}$
22s	0.718 mm	0.152 mm	0.18 $\mu\text{L}/\text{cm}$
22	0.718 mm	0.413 mm	1.34 $\mu\text{L}/\text{cm}$
21	0.819 mm	0.514 mm	2.07 $\mu\text{L}/\text{cm}$
20	0.908 mm	0.603 mm	2.86 $\mu\text{L}/\text{cm}$
19	1.07 mm	0.686 mm	3.70 $\mu\text{L}/\text{cm}$
18	1.27 mm	0.838 mm	5.52 $\mu\text{L}/\text{cm}$
17	1.47 mm	1.07 mm	8.94 $\mu\text{L}/\text{cm}$
16	1.65 mm	1.19 mm	11.2 $\mu\text{L}/\text{cm}$
15	1.83 mm	1.37 mm	14.8 $\mu\text{L}/\text{cm}$
14	2.11 mm	1.80 mm	25.6 $\mu\text{L}/\text{cm}$
13	2.41 mm	1.80 mm	25.6 $\mu\text{L}/\text{cm}$
12	2.77 mm	2.16 mm	36.6 $\mu\text{L}/\text{cm}$
11	3.05 mm	2.39 mm	44.8 $\mu\text{L}/\text{cm}$
10	3.40 mm	2.69 mm	57.0 $\mu\text{L}/\text{cm}$

Determining the Needle Length

HUB STYLE	DIMENSION IMAGE	DESCRIPTION
METAL HUB NEEDLE N NEEDLES		Needle length is specified from the needle point to the start of the hub
KEL-F HUB NEEDLE KF NEEDLES		Needle length is specified from the needle point to the start of the hub
SMALL GAUGE RN HUB NEEDLE		Needle length is specified from the needle point to the start of the support sleeve
STANDARD RN HUB NEEDLE		Needle length is specified from the needle point to the start of the RN nut The distance from the needle point to the hub is length + 1.8 mm
C-F METAL HUB NEEDLE C FEMALE NEEDLES		Needle length is specified from the needle point to the start of the hub
C-M COLORED PEEK NUT FOR RN NEEDLE C MALE NEEDLE		The needles compatible with this nut are: RN Large and RN Small The distance from the needle point to the nut is RN needle length - 11 mm Example: Standard RN Length, 51 mm - 11 mm = 40 mm - tip to nut
HAT HUB NEEDLE		Needle length is specified from the needle point to the start of installation hardware The distance from the needle point to the back end of the hub is length + 14.22 mm
VENTING HUB NEEDLE		The needle length is determined by using this specifications: A = Needle length from the needle point to the start of the hub B = Needle length from the needle point to the sleeve C = Needle length from the needle point to the first venting hole

i The needle length for most standard Hamilton needles is 51 mm \pm 1 mm.

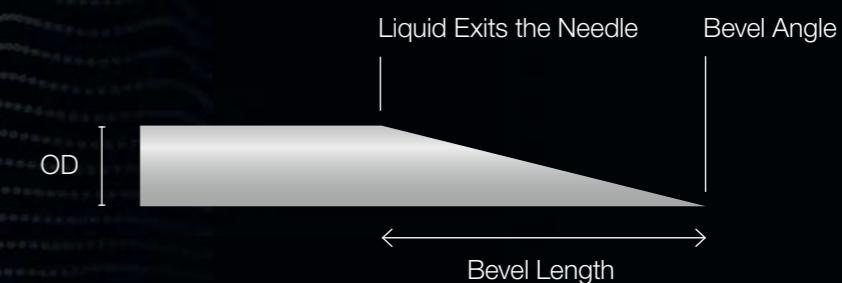

i Custom needles are available in lengths from 10 mm to 304 mm. If a longer needle is required, contact your local representative to determine available possibilities.

Selecting the Correct Point Style

ID	POINT STYLE	DESCRIPTION	APPLICATION	GAUGES
2		10 – 12° sharp, beveled, curved non-coring	Gas Chromatography (GC), septum piercing	33 – 10 ga
3		Blunt, electro-polished	High Performance Liquid Chromatography (HPLC) injection, Thin-Layer Chromatography (TLC), general liquid handling, controlled animal injections	34 – 10 ga
3T		Blunt, electro-polished, coated with PTFE 19 mm from the tip	Thin-Layer Chromatography (TLC) applications	26s, 22s, and 22 ga
4		Sharp 10 – 12° beveled needle; other angles* available upon request	Life science/animal injections	34 – 10 ga
5		Conical with side port for penetration without coring	Headspace, applications prone to needle clogging, causes minimal septum damage	26 – 10 ga
AS		Conical, non-coring designed to withstand multiple injections	Autosampler injection, pre-pierced septa	26 – 10 ga

Calculating Point Style 4 Bevel Length

$$\text{Bevel Length} = \frac{\text{OD}}{\tan(\text{Bevel Angle})}$$

For example: A 27 gauge needle (OD = 0.413) with a point style 4 beveled at 30 degrees:

$$\text{Bevel length} = 0.413 \text{ mm} / \tan 30 = 0.715 \text{ mm}$$

ATENTION! When choosing a custom hubed needle with a sharp Point Style 4, short needle length and large outer diameter! It may be impossible to manufacture (example: KF Needle, at the length of 10mm, needle gauge 10 with Point Style 4 at 10-12 °, the bevel length is between 19 to 16 mm). To avoid this situation the above formula can be used.

You have built
the perfect needle
to perform your
applications

Now, you just have to order it
